

## **Marketing email draft for 019-030-Adam/Efimov**

**Subject:** Bioelectronic Diagnostics Patent Available (George Washington University)

Hello,

I am a Research Fellow in George Washington University's Technology Commercialization Office. Our patent in neuromorphic bioelectronic systems could provide your company, *Company Name*, with a competitive edge.

Researchers at George Washington University have developed a novel implantable system that enables real-time bioelectric signal monitoring, interpretation, and therapeutic response using a compact network of computing chiplets. Leveraging memristor-based architecture and artificial neural networks, this technology eliminates the need for bulky external processors and leads, offering a low-power, efficient, and scalable solution for high-definition diagnostics and therapy.

***Below is the link to the technology and patent number:***

[Memristors and neuromorphic networks for high definition bioelectric diagnostics and therapy](#)

**Patent Number:**

Are you available for a brief call to discuss our technology? Our Senior Licensing Manager, Michael Harpen, would be happy to speak with you.

Best regards,
